Errata in the Schedules to the Wild Life (Protection) Act, 1972

Typographical and formatting errors in the text of Schedules I to IV as published by India Code (consolidated as on 5 June 2025)

About this list

Source. The text examined is India Code's consolidated publication of the Wild Life (Protection) Act, 1972, as on 5 June 2025 (file A1972-53, 222 pages). Page numbers below are those printed on its pages.

Scope. The list covers errors of spelling, typography and layout only: misspelt or run-together names, characters printed in place of letters, text set in the wrong column, a missing heading and a misprinted serial number. Each entry gives the text as printed and the reading proposed.

Nature of the errors. Many are of the kind produced when a printed page is converted to text by optical character recognition (OCR) and not proofread: 'rn' read as 'm' (Pamassius for Parnassius), 'a' as 'o' (Copra for Capra), capital 'I' as 'l' (lndotestudo for Indotestudo), words run together or split, and stray full stops and brackets. The nature of each error is noted under the Item column; 'letters misread' marks those that match a known OCR confusion, and 'spelling' the rest.

Not included. Differences of nomenclature are not treated as errors. Where a name in the Act follows Indian usage, including that of the Zoological Survey of India, it is retained even if other authorities use a different name.

Verification. Each error was identified by comparing the published text with the rendered page and with taxonomic references, and was checked on the page by the Wildlife Trust of India. As the Gazette notification was not available for comparison, some errors may have arisen in the publication rather than in the notified text.
